

The diagram shows two horizontal timelines on a grid background. The top timeline is green and represents a clock signal. It starts with a dashed circle at the first vertical grid line, followed by a series of rectangular pulses. A solid green circle labeled t_0 is positioned at the end of the timeline. The bottom timeline is orange and represents a data signal. It starts with a dashed circle at the first vertical grid line, followed by a series of rectangular pulses. A solid orange circle labeled t_1 is positioned at the end of the timeline. A vertical dashed line is positioned at the first vertical grid line, indicating the start of the timing sequence.
